a study of the phenomenon of emotion contagion or the communication of mood to others

this encyclopedia provides a structure to understand the essential rudiments of human behaviour and interpersonal relationships

the emotions that we feel and also those that we perceive in others are crucial to the social functioning of both humans and non human animals although the role of context has been extensively studied in basic sensory processing its relevance for social cognition and emotional processing is little understood in recent years several lines of research at the behavioral and neural levels have highlighted the bidirectional interactions that take place between emotions and social context experienced emotions even when incidental bias decision making remarkably even basic emotions can be strongly influenced by situational contexts in addition both humans and non human animals can use emotional expressions strategically as a means of influencing and managing the behavioral response of others in relation to specific environmental situations moreover social emotions e g engaged in moral judgment empathic concern and social norms seem to be context dependent which also questions a purely abstract account of emotion understanding and expression as well as other social cognition domains the present research topic of frontiers in human neuroscience highlights the need for a situated approach to emotion and social cognition we presented theoretical and empirical work at the behavioral and neural levels that contribute to our understanding of emotion within a highly contextualized social realm and vice versa relevant contributions are presented from diverse fields including ethology neurology biology cognitive and social neuroscience and as well as psychology and neuropsychiatry this integrated approach that entails the interaction between emotion and social

context provide important new insights into the growing field of social neuroscience

coordinated social interaction belongs to our everyday life whenever individuals align their behavior with each other in time and space a substantial part of social interaction and collective behavior consists in synchronized goal directed actions involving two or more individuals these actions are regulated by various factors that work together calibrated by appropriate coupling mechanisms within and between individuals and their brains hyperscanning studies simultaneous signal recording from multiple individuals has shown that synchronization within and between brains as well as within and between physiological systems and subsystems e.g. respiratory cardiac systems body movements etc. plays a crucial role for social interaction phenomena they can be described most effectively in terms of the cooperation of several parts of the system or subsystems emerging complex network dynamics and its topology represent an imprint of such complex systems behavior and have been outlined in several studies by means of a graph theoretical approach there has been an important growth in publications on inter brain or hyper brain connectivity and network dynamics over the last 20 years however a certain knowledge gap remains between behavioral and neural and also other physiological and physical representations or features and it requires further intensive research

this book constitutes the refereed post conference proceedings of the 15th ccfc conference on computer supported cooperative work and social computing chineseccscw 2020 held in shenzhen china in november 2020 the 40 revised full papers and 15 revised short papers were carefully reviewed and selected from 137 submissions the papers of this volume are organized in topical sections on crowdsourcing crowd intelligence and crowd cooperative computing domain specific collaborative applications collaborative mechanisms models approaches algorithms and systems social media and online communities and short papers

people get emotional about what they believe and so when their beliefs are criticized challenged or even attacked their emotions usually get riled up this is natural it is human nature it happens to most of us feelings and emotions spread easily in society at these times but we have to manage them for the betterment of all of us understanding how to manage them effectively helps lower the turmoil and destruction since emotions drive actions in the book bruce talks about how emotional contagion contributes to social and political turmoil and how people can work at overcoming emotional contagion to lower the turmoil the impact of emotions and feelings during social political upheaval has been strong and he writes about how to manage them to lower their impact in any future events since they can get destructive

based on exciting discoveries in mathematics genetics psychology and sociology connected is an innovative and fascinating exploration of how social networks operate
